## SALE OF LAKE MACKAY TECHNICAL DATA

Reward Minerals Limited (“**Reward**” or the “**Company**”) advises that it has executed an agreement for the sale of data relating to its previously held Potash project at Lake Mackay in Western Australia to Global Resources Corporation Limited (“**Global**”, ASX:GRM).

During its tenure at Lake Mackay the Company compiled significant geological and other data including a JORC (2004) compliant Sulphate of Potash (SOP) Resource. Under the terms of the sale agreement Reward will relinquish its ownership of all geological and technical information accumulated during and relating to its exploration activities at Lake Mackay. In consideration the Company will receive 7,500,000 fully paid ordinary shares in Global which are subject to a 12 month escrow.

The transaction offers Reward shareholders valuable exposure to Global’s projects which are primarily Potash related.

### Karly Project

Further to the Company’s announcement of 19 June Reward advises that the Karly Project tenement E45/4291 has been granted.

Following the grant of E45/4291, the Program of Works (PoW) approval has been received from the Department of Mines for drilling proposals lodged by Reward for the Karly Project. The Company is currently finalising Heritage Clearance as required under the terms of the current Land Access Agreement. A Heritage Survey is scheduled for later this week.

Further information will be provided as it comes to hand.

Yours faithfully,

**Michael Ruane**  
**Director**
